

Could you write a grant support letter for us?

Yes. Staff at the Land and Water Conservation Department can write letters of support for your lake grants if the project is something that supports the goals and objectives outlined in our Land and Water Resource Management Plan. When you contact us with your request, please include some detail about the project you are proposing so that we have enough information to write a letter. If the project does not match up well with our land and water management goals, we do reserve the right to deny the request. Please allow at least a one week notice for us to complete the task.

Refer to the "What We Do" page of the Vilas County Land & Water Conservation Department website for the latest [Land and Water Resource Management Plan](#).
